When they're turning, you're earning.

TRP® wheel end components don't compromise on quality. Backed with 1 year unlimited kilometre warranty and 5 year warranty on our aluminium wheels, TRP® wheel end products are the value alternative to keep your truck moving.

Where there's a wheel there's a way.

TRUCK & TRAILER PARTS®

WHEEL END

ALUMINIUM WHEELS

TRP® aluminium wheels are up to 50% lighter than most steel wheels. Lighter wheels help extend the life of suspension components and tyres and can even help improve fuel efficiencies.

TRP® aluminium wheels also run cooler than steel wheels which reduces stress on tyres and braking components.

ALUMINIUM WHEELS

FEATURES & BENEFITS

- Aluminium wheels can be up to 50% lighter than most steel wheels
- Aluminium dissipates heat better than steel, means cooler running and less stress on tyres and braking components.
- Aluminium wheels are tougher than steel and when measured under the same road conditions, can experience substantially less damage
- 5 Year warranty
- Dynamic radial fatigue tested to 3363.6 Kg (7400 lbs) as per SAE J267 means these wheels are built to withstand the heaviest loads
- Maximum load 3750 kg
- Maximum PSI 130
- Bolt hole size 26mm

HUBCAPS & ACCESSORIES

TRP® hub caps cover the most popular truck and trailer applications and include mounting gasket and filler plug. The use of aluminium in the cap design assists in preventing warping and allows optimal heat dissipation.

HUBCAPS & ACCESSORIES

FEATURES & BENEFITS

- Die cast aluminium design prevents warping and allows more efficient heat dissipation
- Oil level view window allows for fast and easy oil level checks

BEARINGS

TRP® bearings are European designed and engineered to the highest quality and standard. Bearing kits contain everything required for reliable and long term repair (hub caps are included in steer and trailer kits). Seals come pre-lubricated (and are OE approved in many countries). Hub Caps are made from Zytel, being stronger than aluminium and compatible with all popular oils and grease.

BEARING SETS

FEATURES & BENEFITS

- High load carrying and running accuracy
- Each bearing is inspected to the zero defect level
- High performance even under adverse conditions
- Lower level of vibration and lower noise intensity
- Bearing kits SET401TRP and SET403TRP are both rated transmission quality bearings and are specifically produced to suit drive axles
